DETAILED ACTION

Inventorship

1. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Allowable Subject Matter

2. Claims 1-17 are allowed.
3. The drawings filed on May 5, 2006 are acceptable.

Reasons for Allowance

4. The following is an examiner's statement of reasons for allowance:

The prior art fails to disclose or render obvious the claimed combination including calculating a transient volume of EGR sufficient to maintain NOx emitted by an engine below a predetermined level during a period of transient operation of said engine; supplying an actual volume of EGR during said period of transient operation; measuring said actual level of EGR during said period of transient operation; calculating an EGR deficit between said transient volume of EGR and said actual volume of EGR during said period of transient operation; integrating said EGR deficit over said period of transient operation to calculate a deficit volume

Art Unit: 3747

of EGR; calculating a following steady-state volume of EGR sufficient to maintain NO_x emitted by said engine below said predetermined level during a following period of substantially steady-state operation of said engine; and supplying said following steady-state volume of EGR plus said deficit volume of EGR during said following period of substantially steady-state operation of said engine.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The cited prior arts fail to disclose the method of EGR recovery including the steps calculating, supplying, measuring and integrating either the volume or level of EGR. The copies of U.S Patent are not provided.
